PROFESSIONAL PROFILE

Results-driven Software Engineer with expertise in embedded firmware, full-stack development, network systems, and process automation. Experienced in leading cross-functional teams and executing complex technical projects from concept to delivery. Skilled at diagnosing hardware and software issues, modernizing legacy systems, and enhancing production efficiency in diverse environments. Proficient with modern development tools and recognized for strong problem-solving, communication, and adaptability.

EDUCATION

Bachelor of Science in Software Engineering, Western Governors University | Salt Lake City, UT May 2024

- Relevant Coursework: Mobile Application Development (Android), Advanced Java, Advanced Data Management, Front-End Web Development, Back-End Programming, JavaScript Programming, Software Engineering, Version Control

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript, C++, C, HTML, CSS, MySQL
Software development	Git, AWS, Spring Boot, React, IAR Embedded Workbench, Docker, Maven, IntelliJ IDEA
Soft Skills	Communication, Teamwork, Problem-Solving, Adaptability, Leadership, Self-Directed Learning

CERTIFICATIONS

- CompTIA A+ • CompTIA Network+ • CompTIA Security+ • ITIL 4 Foundation • AWS Cloud Practitioner

WORK EXPERIENCE

Software Engineer, Universal Switching Corporation | Burbank, CA September 2024 - Present

- Served as Lead Technical Support director for software-related cases, interfacing with clients to diagnose and resolve complex hardware and firmware issues, improving reliability and customer satisfaction.
- Developed and deployed over 50 custom embedded firmware solutions across multiple switching platforms, enhancing performance and system stability while increasing software update reliability by 70%.
- Directed 12+ projects and coordinated a team of five engineers, ensuring timely delivery, technical accuracy, and alignment with company objectives.
- Innovated system functionality by implementing numerous new features and overhauling the system's web-based control interface, showcasing expertise in software development, user experience, and client-oriented solutions.
- Collaborated with cross-functional teams to isolate and resolve critical hardware and software issues, driving consistent communication, product reliability, and quality improvement.

Field Technician, Insane Impact | Remote July 2022 - September 2024

- Diagnosed and resolved intricate network challenges, resulting in improved network performance and reliability, demonstrating the ability to adapt and problem-solve.
- Demonstrated effective communication skills while collaborating with cross-functional teams on large projects, leading to successful project completions and client satisfaction.
- Consistently delivered project milestones ahead of schedule by implementing efficient project management techniques, showcasing the ability to thrive in high-pressure environments.
- Traveled across the country to install and configure operating systems, leading the programming of complex LED installations and ensuring seamless functionality.

Process Developer, Piccola Homes | Simi Valley, CA February 2023 - August 2023

- Implemented automation solutions that increased production speed by 30% and streamlined construction workflows.
- Crafted comprehensive building instructions, enhancing replicability for future projects.
- Constructed innovative methods that elevated tiny home quality, ensured adherence to industry best practices, and improved both customer satisfaction and product quality.

Construction Technician, Davis and Sons Construction, Simi Valley, CA January 2016 - July 2022

- Conducted site inspections to ensure construction adhered to design specifications and safety standards.
- Utilized Revit to create detailed construction plans for residential homes and ADUs (Accessory Dwelling Units).
- Managed project timelines and budgets, ensuring timely project completion within-budget.

Drafting Technician, Todd B. Spiegel Architects, Thousand Oaks, CA July 2014 - July 2017

- Created and maintained a master library of construction drawings.
- Enhanced the readability and usability of architectural drawings through meticulous cleanup and proactive planning.
- Utilized development software such as Revit and AutoCAD to create detailed construction drawings.
